cathtemp *Feeling thermometer:catholics*

Description

cathtemp

Details

Question I'd like to get your feelings toward groups that are in the news these days. I will use something we call the feeling thermometer, and here is how it works: I'll read the names of a group and I'd like you to rate that group using the feeling thermometer. Ratings between 50 degrees and 100 degrees mean that you feel favorable and warm toward the group. Ratings between 0 degrees and 50 degrees mean that you don't feel favorable toward the group and that you don't care too much for that group. If we come to a group whose name you Don't recognize, you don't need to rate that group. Just tell me and we'll move on to the next one. IF you do recognize the name, but you don't feel particularly warm or cold toward the group, you would rate the group at the 50 degree mark. How would you rate this group using the thermometer? D. congeth *Should ethnic congressmen represent ethnic groups*

Description

congeth

Details

Question Some people say that it is only fair that in a society like ours, people holding public office should have roughly the same racial or ethnic background as the population as a whole. So, for example, if 30pct of the people were Hispanic, then 30pct of the public officials should be Hispanic as well. Others say that in choosing people for public office they should be considered purely on the basis of ability without regard to their ethnic or racial background. Let me ask you about these ideas in several different areas. A. What about people in Congress? Should they have the same racial or ethnic background as their constituents, or should they be considered purely on the basis of their ability without regard to their racial or ethnic background?

Details

Question I'd like to get your feelings toward groups that are in the news these days. I will use something we call the feeling thermometer, and here is how it works: I'll read the names of a group and I'd like you to rate that group using the feeling thermometer. Ratings between 50 degrees and 100 degrees mean that you feel favorable and warm toward the group. Ratings between 0 degrees and 50 degrees mean that you don't feel favorable toward the group and that you don't care too much for that group. If we come to a group whose name you Don't recognize, you don't need to rate that group. Just tell me and we'll move on to the next one. IF you do recognize the name, but you don't feel particularly warm or cold toward the group, you would rate the group at the 50 degree mark. How would you rate this group using the thermometer? B. `crtrheal` *Contrast between creator and healer*

Description

crtrheal

Details

Question There are many different ways of picturing God. We'd like to know the kinds of images you are most likely to associate with God. Here is a card with sets of contrasting images. On a scale of 1-7 where would you place your image of God between the two contrasting images? (HAND CARD AE) The first set of contrasting images shows Mother at 1 on the scale and Father at 7. If you imagine God as a Mother you would place yourself at 1. If you imagine God as a Father, you would place yourself at 7. If you imagine God as somewhere between Mother and Father, you would place yourself at 2, 3, 4, 5, or 6. (REPEAT EXAMPLE AS NECESSARY FOR EACH ITEM A-F, SUBSTITUTING IMAGES A-F FOR "MOTHER" AND "FATHER".) Where would you place your image of God on the scale for . . .
