uscenpops	<i>US Census and Intercensal Population Counts and Estimates</i>
-----------	--

Description

US Census population estimates by year of age and sex, 1900-2019

Usage

`uscenpops`

Format

A tibble with 10,520 rows and 5 columns

`year` Year in `<int>` format. Where multiple monthly or quarterly estimates were available in the original data, the July estimate was used for the yearly count.

`age` Age in years. Top-coded at 75 between 1900 and 1939, at 85 between 1940 and 1979, and 100 thereafter.

`pop` Total population count.

`male` Male population count.

`female` Female population count.
